LOUDSPEAKER

The brand new **EX130 SQ EVO3** midrange driver is the successor to the **EVO2** in the **SQ SERIES**, but now with a **NEODYMIUM** magnet.

This newly developed mid-range loudspeaker impresses with numerous subtleties and details. **AUDIO SYSTEM** shows first-class engineering since the **EVO3** impresses with a stable and low-resonance basket, a 4-layer 3 Ohm **KAPTON** voice coil, a highly efficient **EPN38 NEODYM** magnet and a **NOMEX** spider for linear decay parameters with a very low-resonance **NAWI-HPPC** -Membrane including glass fiber reinforcement. Last but not least, this 130mm chassis plays impressively deep when playing music.

Power:

2x 90 WRMS

Impedance:

3 Ohm

Sizes:

Installation Depth: 56 mm

Installation Dim.: 113 mm

Frequency Response:

65-4000 Hz

EX130 SQ EVO3

since 1988
