LOUDSPEAKER

After the brand new HX165 SQ EVO3, the 130mm set HX130 SQ EVO3 is being part of the **AUDIO SYSTEM** program and out now.

The **AUDIO SYSTEM** engineers have succeeded in integrating numerous sound features, which is why the **CAR&HIFI** magazine calls our new system a **HIGH END** speaker system! Starting with a more stable and low-resonance basket, a 4-layer 3 Ohm **KAPTON** voice coil, a highly efficient **EPN38** **NEODYM** magnet and a **NOMEX** spider for linear decay parameters, which lead to a long service life. Last but not least, the HX130 SQ EVO3 scores with a low-resonance **NAWI HPPC** membrane with glass fiber reinforcement.

Power:

2x 100 WRMS

Impedance:

3 Ohm

Consisting of:

2x EX160 SQ EVO3

2x HS25 EVO2

2x FWX EVO2

Frequency Response:

65-22000 Hz

HX-130 SQ EVO3

since 1988
