LOUDSPEAKER

The **XC130 EVO** follows the **XC165 EVO** in the **AUDIO SYSTEM** range and is ready to be ordered.

This newly developed COAX loudspeaker series impresses sound freaks as well as the rest of the car hifi community thanks to its breathtaking sound and cool dynamics. The development ideas remain at least as dynamic, which has been impressively demonstrated with this series. The new high-end XC SERIES stands out with a stable and low-resonance basket, a 4-layer 3 ohm KAPTON voice coil, a highly efficient EPN38 NEODYM magnet, plus a NOMEX spider for linear decay parameters with a very low-resonance NAWI HPPC membrane including glass fiber reinforcement and last but not least, an excellent-sounding 25mm neodymium tweeter with the latest SOFT-DOME membrane technology.

Power:

2x 90 WRMS

Impedance:

3 Ohm

Sizes:

Installation Depth: 56 mm

Installation Dim.: 113 mm

Frequency Response:

65-20000 Hz
