## LOUDSPEAKER

**AUDIO SYSTEM** developed the first 165mm **DUST** speaker system more than 15 years ago. Nobody could have predicted its success story. It is now successfully continued with the **DUST EVO3** line.

The new **EVO3 SERIES** is no longer just a 165mm set. The selection now ranges from 80mm to 165mm, **ACTIVE** and double compo systems. Included in the scope of delivery of all sets: the newly designed **HS25 DUST EVO**, which, in contrast to its predecessor, is more spirited, detailed and lively. The **AUDIO SYSTEM** engineers have succeeded in raising all the new **EVO3** midrange drivers to a considerable sound level. All chassis combine a more stable and low-resonance die-cast basket, a 4-layer **KAPTON** voice coil, the newly developed, highly efficient **EPN38 NEODYM** magnet and a low-resonance **NAWI HPPC** membrane with glass fiber reinforcement.

Power:

from 2x 110 WRMS to  
2x 350 WRMS

Impedance:

3 Ohm

Consisting of:

2x EX165/130/100 **DUST EVO3**

2x **HS25 DUST EVO**

2x **FWHX EVO**

Frequency Response:

60-30000 Hz

**HX165 DUST 3-WAY EVO3**

**HX165 DUST-4 EVO3**

**HX165 DUST PRO ACTIVE EVO3**

**HX130 DUST ACTIVE EVO3**

since 1988
