LOUDSPEAKER

HX PHASE loudspeakers have stood for pure HIGH END sound for decades. In addition to the **DUST** series, the **PHASE** loudspeaker systems have now also been brought to an even higher sound level thanks to innovative improvements.

PHASE EVO3 stands for maximum sound demands, detailed tone, excessive precision in the mid-range, outstanding accuracy in the highs, warm timbre and fullness. All around, the **PHASE EVO3** shows a performance that every sound enthusiast will rave about. The basic structure of the **PHASE** series is the newly developed **HS30 PHASE EVO** tweeter. Coupled with the new midrange chassis and the **FW HX EVO** crossover (with the highest quality components), these speaker systems create an incomparable sound experience for the listener. In contrast to the **DUST SERIES** midrange speakers, the **PHASE** line has - as the name already suggests - a **PHASEPLUG**. But not just an ordinary one, nothing less than the ultimate one! The one you've been waiting for. This innovative inverse cone was created after long testing and listening sessions. Matt black - radiant from the center - ready to process the music material precisely...

Power:

From 2x 110 WRMS to
2x 220 WRMS

Impedance:

3 Ohm

Consisting of:

2x EX165/130/100 PHASE
EVO3

2x HS30 PHASE EVO

2x FWHX EVO

Frequency Response:

60-25000 Hz
