DSP-AMPLIFIER

since 1988
AUDIO SYSTEM
german sound

BEST PRODUCT / top class is the verdict of trade journal **CAR&HIFI** in issue 3/2022 of the new the **X-80.4 DSP-BT** with APP control, which can do everything and does not pose any puzzles.

The **X-80.4 DSP-BT** has 6x inputs in the mixer area and 8x freely routed processed outputs, 4x of which can be used for the internal power amplifier. The entire DSP can be controlled with the new APP via Bluetooth (Android and soon also iOS). The complete development of both DSP power amplifiers **R-110.4 DSP-BT & X-80.4 DSP-BT** took place at **AUDIO SYSTEM**. A huge advantage regarding further development and future UPDATES. The user can look forward to the updates, because useful surprises can be expected here. The various filter characteristics can be set with up to 48 dB edge steepness.

CAR&HIFI writes: affordable, state-of-the-art DSP amplifier, which is very easy to set up, brings a good mood and sound fun to every vehicle.

BTL or SE Detection with automatic switch on
Power:

4x 80 WRMS @ 4 Ohm
2x 150 WRMS @ 2 Ohm
2x 300 WRMS @ 4 Ohm

Size:

180x45x158 mm

DSP-Equipment :

8x Presets

8-channel DSP, 4x of it are routed to the RCA outputs

30x parametric EQs

per channel

APP control

1x AUX input

X-80.4 DSP-BT
