SUBWOOFER

New to the **AUDIO SYSTEM** range are the very flat **HX FLAT WOOFERS**.

Two copies are available: **HX10 FLAT EVO** and **HX12 FLAT EVO**. Both premium flat subwoofers offer breathtaking performance, dynamics and depth. Due to their very flat design, the HX FLAT woofers are predestined to become a problem solver. This is also supported by the appropriate Thiele-Small parameters, which allow for small, closed housings.

Both FLAT's are equipped with a 2x 2 Ohm Kapton voice coil, attractive die-cast basket, highly stable paper cone and push terminals. Thanks to the double voice coil, the HX basses can be used very variably, for example with the MD 4-channel power amplifiers.

The CAR&HIFI is full of praise and writes: Elegant woofer chassis with great performance for an attractive price. Remarkable depth paired with a great and dynamic sound.

Power(WRMS):

2x 150 WRMS

2x 200 WRMS

Impedance:

2 Ohm + 2 Ohm

Frequency Response:

25-150 Hz
