

SUBWOOFER

AUDIO SYSTEM gets growth in the subwoofer range with the new **SW 11** SERIES.

The 11 stands for the 11-inch woofer, which was integrated into a round, closed and very stable die-cast housing. The woofer and the housing thus form a unit that can be installed in a wide variety of spare tires. Four different versions are available. The **SW 11 ACTIVE** is internally powered by a 150 WRMS power amplifier, which is adjusted via the REMOTE CONTROL **RTC SW 11** (FREQUENCY, GAIN, BASS BOOST and PHASE). In addition, the electronic amplifier module has separate LOW (RCA) and HIGH-POWER inputs (with automatic "Turn On"). The **SW 11 PASSIVE** was equipped with a 2x 2 Ohm voice coil and is to be operated via an external amplifier. The last two in the alliance **SW 11 ACTIVE UNI** and **SW 11 PASSIVE UNI** are identical to the two models mentioned above. With the **UNI** subwoofers is a **SW 11 MOUNTING KIT**, which allows both woofers in the VW T5, VW T6, VW T6.1, PEUGEOT Boxer, CITROEN Jumper or FIAT Ducato to install under the passenger seat (equipment-dependent, also possible with many rotary consoles).

Power:

1x 150 WRMS

2x 175 WRMS

Impedance:

4 Ohm

2 Ohm + 2 Ohm

including:

1x RTC SW11 Remote Control

1x PCS SW11 Kabelsatz

1x SW11 MOUNTING KIT (only UNI)

Frequency Response:

35-150 Hz

PRICE:

325,-€ / 390,-€(UNI)

275,-€ / 340,-€(UNI)

SW 11 ACTIVE

SW 11 PASSIVE

SW 11 PASSIVE UNI

Built in at FIAT DUCATO

SW 11 ACTIVE UNI

Built in at VW T5
